

Tastes Vary

In Toilet Soaps the same as in everything else. Some like the peculiar characteristics of one soap; some of another.

No one make can suit everybody, but

Buttermilk Soap

has gained a larger measure of popularity in proportion to the years it has been on the market than any other soap made.

It is the HIGHEST STANDARD OF QUALITY in every detail and particular.

BUTTERMILK TOILET SOAP

Over 1,000,000 Ladies who have used it pronounce it the Best Soap in the World For the Complexion. Exceeds any 25c. Soap. Ask your dealer for it. Full size sample, 12 cents. Beware of imitations. Cosmo Buttermilk Soap Co. 64 Adams Street, Chicago.

You cannot be too cautious about the quality of soap used on your face or hands. Many of the so called "purity" face soaps are nothing more nor less than a mixture of harmful ingredients put up in an attractive wrapper to sell at sight. No thought is given whether the consumer is injured by its use or not.

The better the grade of soap, the more friends it will constantly gain. That's why we call your attention to

Buttermilk Soap.

It is perfectly harmless and beneficial to the complexion.

More Potash

in the fertilizers applied on the land means a larger and better yield of crops, permanent improvement of the soil, and

More Money

in your pocket.

Stable manure being very scarce in the tropical zone, artificial fertilizers supplying plant-food suited to the needs of the different crops become necessary. The full and beneficial effect of Potash can only be obtained when the necessary amount of phosphoric acid is also applied. Potash Salts should in all cases be well mixed with Phosphates prior to being applied.

Find by analysis what is lacking in your soil. To insure a good yield Lime, Potash, Nitrogen, and Phosphoric Acid should be present.

KNOW THYSELF

SCIENCE HELPS YOU TO BE YOUR OWN DOCTOR.

The Story of a Woman Who Kept on the Work of Science and Saved Her Own Life.

From the Era, Bradford, Pa.

Too few people are acquainted with the rapid advance of medical science, and too many doctors are still plodding in the old paths. Once it comes to pass that people know themselves, that all physicians are abreast of the world's knowledge, much of our suffering will come to an end. Medical scientists are not delving into the depths of knowledge for the benefit of the world. They place in the hands of the well man a means of keeping well, in the hands of the sick man a means of recovery. To the parent they give the power of saving the child. Science is working for you—will you accept the proffered help?

Mrs. George Rowend, an estimable lady who resides at No. 276 East Main Street, has cause to feel grateful towards the science of medicine.

One day recently a reporter, learning that Mrs. Rowend had been greatly benefitted by the use of a new medicine, interviewed her. She stated that she had been suffering with a female trouble for many years. She had been doctored for the ailment for a long time—in fact, nearly all her life—and had never received anything more than temporary relief. During the last three years her condition grew worse and was aggravated by an affection of the heart. Her health was so poor that she found it almost impossible to perform her household duties.

"I never believed in proprietary medicines," said Mrs. Rowend, "but one day last fall I read an article in a newspaper which told of the cures effected by Dr. Williams' Pink Pills, and I decided to try the medicine. Before I had taken the contents of one box I began to feel better. The depressing weakness which had bothered me for so many years began to disappear, and the action of the heart at once became stronger and more regular."

"I took nine boxes of the pills and I am now feeling better than I have for several years, and I have unbounded faith in the medicine."

Mrs. Rowend is steadily gaining in health and strength and gives all the credit for her health and strength to Dr. Williams' Pink Pills for Pale People.

Dr. Williams' Pink Pills contain, in a condensed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are an unfailing specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus' dance, sciatica, neuralgia, rheumatism, nervous headache, palpitation of the heart, paleness and all forms of weakness either in male or female.

Sold by the Hollister Drug Co., the Hobron Drug Co., wholesale agents for Hawaii and all dealers in medicine.

ANNUAL LEGISLATIVE SESSIONS. Only six of the forty-five States of the Union indulge in the extravagance of annual sessions of the Legislature, to-wit: Georgia, Massachusetts, New York, Rhode Island and South Carolina, all belonging to the original thirteen.

A VALUABLE DIVING DRESS.

A trial has been made of a new sea-diving dress in the deepest part of Sydney harbor. The diver went down in 26½ fathoms and remained at the bottom for fifty minutes. When he came up he showed no signs of distress.

A DICKENS LANDMARK SOLD.

The old George IV tavern in Portugal street, London, which Dickens' commentators unite in saying is the house which the novelist described in "Pickwick," has just been sold at auction for £7550.

Tea is better fresh—if it isn't, what does the grocer mean by telling you that he has some tea just come from abroad?

Fresh doesn't mean just picked; it means just roasted.

Schilling's Best is roasted as fast as your grocer wants it—no faster—in San Francisco.

A Schilling & Company San Francisco

"LIGHT RUNNING DOMESTIC." Every lady has heard of this world renowned sewing machine. They have the lock and chain stitch attachments, with all the very latest improvements. L. B. Kerr has been appointed sole agent for the Islands, as well as for the "Wheeler and Wilson" machines, and keeps a full supply of machine fittings, needles, etc., etc.

That firm is dead that does not advertise.

ALL ALONG THE DOCKS

FLEET OF COAL VESSELS FOR PORT OF HONOLULU.

Amy Turner Will Leave for Hong-kong—Aloha Sails Next Week—Kapaa Channel Choked With Sand.

The Amy Turner will sail for Hong-kong on Monday.

The Hawaiian ship John Ena will load coal at Newcastle for San Francisco.

Four master schooner Echo, Capt. Foey, will load coal at Newcastle for Honolulu.

The steamer Noeau arrived this morning with 4200 bags of sugar, part of which goes into the Aloha.

The schooners Novelty, Lewis, ship Louisiana and the barks Nonantum, Colorado, Mauna Ala, are in port at Newcastle to load coal for Honolulu.

Schooner William Bowden left Newcastle on February 23rd, for Honolulu, with 1251 tons of coal. The bark Fortuna and bar-entine Olga are bound for this port also.

The Aloha has hauled over to Willet's wharf. She still needs 9600 bags to top off her cargo, but Capt. Dable expects to have them in by Monday night, so that he can sail Tuesday.

Steamers from Kauai this morning report 21,000 bags of sugar still on the island, including the cargoes of the Hall and Mikahala. The latter has 5000 bags, and the Hall a full load.

The American barkentine C. C. Funck arrived at Newcastle on the 5th from Eureka (Humboldt Bay) with a cargo of redwood consigned to Messrs. Goodlet and Smith. After discharging the vessel will load coal for Honolulu.

Port Surveyor Stratmeyer distributed among the pilots and masters in port this morning the revised international "rules of the road," to prevent collisions at sea, issued by the United States Government.

The James Makee arrived this morning with 2295 bags of sugar and 50 of rice. The sugar goes into the Packard. Mrs. Stair and son, Dr. Walters and Capt. Cutler, of the Barkentine Kikikat, were passengers from Kapaa.

The R. M. S. Warrimoo got away soon after midnight. She was delayed in reaching this port by head wind during the latter portion of her passage. She left her usual quota of coal on the dock. The only passengers for this port were C. A. McRowell and M. Williams.

The American bark Snow and Burgess sailed past yesterday afternoon and Capt. Macauley got just close enough to learn that she was thirteen days from San Francisco, bound for Vladivostok with a cargo of general merchandise, in a hurry.

Capt. Tullett, of the steamer James Makee, reports that the channel at Kapaa has been so filled up with sand by the recent storms that the steamer bumped on the bottom going in and coming out. Capt. Tullett thinks that the channel will clear itself when the wind changes.

The schooner Golden Shore left Newcastle on the 10th, with 1166 tons of coal for Kahului. The following vessels are now on their way to Honolulu: schooners Reaper, Oceania Vance; bark Newsboy and barkentine Ensensada, all coal laden. Bark Charles B. Kenny is on the list to load.

Sydney Commercial News says that advices are to hand to the effect that the American barkentine C. F. Crocker, which recently put into Auckland in a leaky condition, while on her way from Newcastle to Honolulu, with coal has discharged her cargo at Auckland, and has sailed in ballast for San Francisco.

The Kauai arrived from Makaweli this morning without a single bag of sugar and with fifty tons of the coal she had for that port. On the 25th the mill at Makaweli broke down and the Kauai had to make a special trip back here to have the machinery repaired. The work will be done in time for the steamer to sail again this afternoon. She will carry up a lot more coal.

ARRIVALS

Saturday, March 27.

CYCLISTS DRINK IT

—in preference to all other beers—because Rainier is pure—because it's nourishing and strengthening—because "immoderate indulgence" does not give them a "head" the next morning. On tap or in bottles at the Criterion.

SIGNS OF SPRING.

With Spring comes the ever welcome Beck Beer. By the Miowera the Criterion saloon received a large consignment of the celebrated Beck Beer brewed by the Seattle Brewing and Malting Company.

Weekly Star, \$4 per year.

JAPANESE GOODS.

Finding a Good Market in the Colonies.

The efforts made in certain quarters to deride and ridicule the idea of extensive Japanese importations to New South Wales are not, unfortunately, having the effect of preventing Japanese merchants from pushing a large and increasing business here, says the Australian Star. As is well enough known in business circles, the number of orders being sent over to Japan to supply the Sydney market are increasing daily in volume. In the boot and shoe line, as the "Star" showed conclusively in an interview with a city boot merchant the other day, the Japanese manufacturers have made (for them) a good start in Sydney, and the manufacturers of other kinds of merchandise are busily following suit. The fact is that not only New South Wales but all the Australian colonies are being exploited by enterprising agents traveling on behalf of big manufacturing firms in Japan. What capitalists are at the head of these Japanese firms that are now undeniably pushing their wares in New South Wales, and Australia generally, is a secret that the traveling agents are not disposed to reveal. All they say is "Give us the order, and if the goods we send do not suit you need not have them. The modus operandi of these travelers is unique, but, after all, only what is to be expected under the circumstances.

Early Bicycles Mechanically Wrong.

Bicycles in the past, it seems, were constructed not only with excessive weight and want of graceful lines, but in disregard of sound and familiar mechanical principles. A writer in Cassier's Magazine says:

We are often wont to think that in these days of scientifically trained designers there is less of the cut and try in constructive mechanics and more of scientific proportioning, but there are some glaring examples of the very opposite. Every one can remember the fearfully and wonderfully distorted shapes of the earlier bicycles, and one has only to pick up an old catalogue or glance through the advertising pages of any of the leading magazines of a few years ago to be reminded of the outrageous defiance of all rules, mechanical and artistic, which those vehicles exhibited.

One can scarcely believe that any attempt whatever was made to ascertain the forces or analyze the strains upon either frame or driving gear, and the present light and stiff frames and carefully proportioned propelling gear are the result of many trials and failures—a "survival of the fittest" rather than an "evidence of design." It is difficult to avoid the conclusion that a large sum of money and a vast amount of human energy might have been saved had just a little knowledge of mechanical design been infused into those early efforts, and, indeed, there are wheels now in the market making claims for superiority upon points which, to the engineer, are obvious mechanical defects, so that the cut and try stage cannot yet be considered as altogether past.

The Great Khan as a Hunter.

The emperor hath numbers of leopards trained to the chase, and hath also a great many lynxes taught in like manner to catch game, and which afford excellent sport. He hath also several great lions, bigger than those of Babylonia, beasts whose skins are colored in the most beautiful way, being striped all along the sides with black, red and white. These are trained to catch boars and wild cattle, bears, wild asses, stags and other great or fierce beasts. And 'tis a rare sight, I can tell you, to see these lions giving chase to such beasts as I have mentioned. When they are to be employed, the lions are taken out in a covered cart, and every lion has a little doggie with him. They are obliged to approach the game against the wind, otherwise the animals would scent the approach of the lion and be off.

There are also a great number of eagles, all broken to catch wolves, foxes, deer and wild goats, and they do catch them in great numbers. But those especially that are trained to wolf catching are very large and powerful birds, and no wolf is able to get away from them.—"The True Story of Marco Polo," by Noah Brooks, in St. Nicholas.

IT'S A PUZZLE.

To find a more pleasant or convenient way of seeing Honolulu and environs than on a wheel. First class bicycles to rent at the PACIFIC CYCLE & MANUFACTURING CO.'s, Love building, Fort street.

"NOW IS THE TIME."

At this reason of the year good housewives are thinking of replenishing their stock of bed and table linen, and for their special benefit L. B. Kerr has imported a large and varied lot, which he will sell at prices that no competition can come near.

"Put Me Off at Buffalo"

The title of this well known song as well as the song itself emanated from the brain of an employee of the Buffalo Brewing Company. This excellent beer is on draught at the Cosmopolitan, Pacific, and Royal saloons. The interchangeable check system is found very valuable to patrons.

If your Purse Leaked

You'd stop that leak instantly. How about your house? Is there any leakage there? A house is really a purse with lots of money in it. This wet weather is hard on your roof and unless properly looked after every cent's worth will leak out. Better see me now.

STERLING, THE PAINTER

Cures Talk

"Cures talk" in favor of Hood's Sarsaparilla, as for no other medicine. Its great cures recorded in truthful, convincing language of grateful men and women, constitute its most effective advertising. Many of these cures are marvelous. They have won the confidence of the people; have given Hood's Sarsaparilla the largest sales in the world, and have made necessary for its manufacture the greatest laboratory on earth. Hood's Sarsaparilla is known by the cures it has made—cures of scrofula, salt rheum and eczema, cures of rheumatism, neuralgia and weak nerves, cures of dyspepsia, liver and kidney troubles, catarrh and malaria.

Such Cures as This Prove Merit.

"My little nephew was a plump and healthy baby until a year and a half old, then sores broke out behind his ears and spread rapidly over his head, hands and body. A physician said the trouble was scrofula humor in the blood. The child became one complete sore. We had to restrain his hands to keep him from scratching the sores. We were induced to try Hood's Sarsaparilla, and in a short time he had more life. He improved rapidly, his skin became entirely clear of sores and he is now a healthy child." Mrs. FLORENCE ANDREWS, Clearfield, Iowa.
